

# NITHISH KUMAR

Full Stack Developer

## PERSONAL DETAILS

**Mobile** 6380781812  
**Email** nithish81812@gmail.com  
**Address** Tuticorin,India  
**Linkedin** [Nithish kumar](#)

## Academic Credentials

BE-COMPUTER SCIENCE AND  
ENGINEERING (Pursuing)  
**DR Sivanthi Aditanar College Of  
Engineering**  
CGPA :7.6

**HSC**  
**St Francis Xavier's Hr Sec School**  
Grade : 7.0

## Core Skills

- Problem Solving & Logical Thinking
- Programming Fundamentals (JavaScript, Java)
- Web Development (HTML, CSS, React)
- Backend Development (Node js)
- API Integration & RESTful Services
- Version Control (Git & GitHub)
- Debugging & Error Resolution
- Database Management (MySQL)
- UI/UX Understanding
- Responsive Web Design

## Operational and Soft Skills

- Communication Skills
- Time Management
- Team Collaboration
- Adaptability
- Attention to Detail
- Critical Thinking
- Fast Learning Ability
- Creativity & Innovation
- Decision Making
- Multitasking

## PROFESSIONAL SUMMARY

Motivated and detail-oriented Computer Science student with strong skills in web application development. Experienced in building real-world projects including a React-based Spotify clone, a MERN stack Health care application using React.js,Node.js. Skilled in JavaScript, React, Java with a solid understanding of algorithms, operating systems, networking, and software engineering principles. Known for strong logical thinking, quick learning ability, and the capacity to break down complex problems into simple, actionable steps. Seeking an opportunity to apply technical skills, grow professionally, and contribute to impactful software solutions.

## Projects

### Healthcare Management System-MERN STACK

- Oversaw budgeting, cost analysis, and financial tracking to optimize expenses and ensure profitability in television operations.
- Led end-to-end syndication operations, managing content delivery, vendor coordination, rights compliance, and revenue optimization.

### Netflix Clone – React & Firebase

A fully responsive Netflix Clone web application developed using React.js and Firebase, designed to replicate the core features and user experience of the original Netflix platform. The application allows users to browse movies and TV shows with a modern UI, smooth navigation, and real-time authentication.

### Weather App-JavaScript

Created a real-time weather application using a public Weather API to display temperature, humidity, and conditions.

### ToDo App – JavaScript(Local Storage)

- Built a task manager with add/delete/complete task features using browser local storage for data persistence.

## Language

- English
- Tamil
